

IHXL & IHSeed Symposium

December 9th 2025

13:00 - 13:30	Registration with a snack
13:30 - 13:50	Daniëlle Barendregt Borrowing from the neighbors: leveraging B cell insights from other disease fields to advance treatment of IBD, a classical T-cell mediated disease.
13:50 - 14:10	Julia Giezen The ACPA B cell response as proxy for immunological disease activity. Sabrina Pallastro The power of multi-omics single-cell approaches to dissect B cell differentiation
14:10 - 14:30	Gertjan Wolbink & Laura Boekel AI: Back to the future of medicine
14:30 - 14:50	Jorge Cuenca Escalona Polymeric nanoparticles to restore immune balance in autoimmunity.
14:50 - 15:30	Break
15:30 - 16:00	Juan Garcia Vallejo META-IMMUNOTYPES: Decoding immune-metabolic homeostasis to better understand chronic diseases.
16:00 - 16:30	Willem Mulder Nanomedicine-based immunotherapy – Concepts, entrepreneurship & clinical translation
16:30 - 17:00	Tale Sliedrecht Future directions
17:00 - 18:00	Drinks
